

SAMIR POKHREL

React Native / Mobile Engineer

Oshawa, Ontario, Canada | +1-905-718-3412 | sameerpokharel29@gmail.com | [Portfolio](#)

SUMMARY

Full-stack engineer with 5+ years building production React/TypeScript applications, now applied to React Native (Expo) mobile development. Delivered a cross-platform fitness app MVP covering authentication, social features, and Stripe payments end-to-end. Strong background in component-driven UI, RESTful API design, role-based access control, and CI/CD-backed delivery. Comfortable working across mobile and web codebases and collaborating with senior engineers to follow established architectural patterns.

TECHNICAL SKILLS

- **Mobile:** React Native (Expo), cross-platform UI development, IoT device integration, push/webhook-driven features
- **Languages:** JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3
- **Frontend:** React, Next.js, Angular, Redux (Toolkit, Duck pattern), Hooks & composition patterns
- **Backend:** Node.js, Express, Laravel, Supabase, PostgreSQL, MongoDB, REST API design
- **Auth & Payments:** OAuth/social login, Supabase Auth, role-based access control, Stripe payment integration, webhooks
- **Testing & Tooling:** Cypress (E2E), Git/GitHub, Postman/Swagger, Vite/Webpack/Babel
- **DevOps & Cloud:** AWS, GCP, Heroku, Render, Netlify, Docker, CI/CD pipelines (GitHub Actions)

RELEVANT MOBILE PROJECT

Founding Engineer (MVP) — SaaS Fitness Companionship App

Contract Based Project

- Built a cross-platform mobile MVP in React Native (Expo) covering workout generation/tracking, social & group workouts, and event RSVP.
- Implemented authentication and authorization with Supabase Auth, including personalized per-user workout experiences.
- Integrated IoT sensor data for exercise posture and body-tracking feedback within the mobile app.
- Designed the backend on Node.js/Express with Supabase Postgres and Supabase Storage; deployed on Render with webhook-driven event handling.
- Implemented Stripe payment integration for subscription/premium features, covering checkout and webhook-based order handling.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Orgware Construct

May 2023 – May 2024

- Built user registration/authentication flows, password recovery, and third-party OAuth/social login integrations for a medical coding platform.
- Developed a role-based access control system enabling flexible permissions and privilege escalation, improving data security.
- Integrated a compiled WASM module via JavaScript, materially improving application performance.

React JS Developer — Waft Technology

Oct 2022 – May 2023

- Built SEO-friendly, SSR e-commerce experiences with Next.js using a View-Model-Data layered architecture.
- Integrated Stripe payments with Firebase for subscriptions, authentication, and authorization.
- Delivered an admin dashboard spanning inventory, point-of-sale, and role-based user management modules.

React Developer — Techart Trekkies

Sep 2021 – Sep 2022

- Developed Leave Management, Attendance, Payroll, and Role Management modules using React.js.
- Managed application state with Redux (Duck pattern) and integrated REST APIs across modules.

EDUCATION

Data Analytics in Business Decision Making — Durham College

Jan 2025 – Aug 2025

B.E., Electronics & Communication Engineering — Kathford International College of Engineering & Management 2021
